## What a Week!

*Our last day of the We Supply America Bus Tour ended where it began – USW Headquarters surrounded by our USW siblings.*

It was an honor to be on the bus all week – [wrapped by our siblings at Local 8042 at Starr Graphics in Butler, PA \(usw.to/3wd\)](#) – and see up close and personal just how important Steelworkers are to the things that keep our communities working. Our last stop once again left us touting the same battle cry - ***We Supply America!***

*“This is a pivotal moment for this country & also a moment for all of us to recognize the value & dignity of your work. I want to salute you for what you’re doing for the future of our country. You have never waited for your own future-you’ve invented it.”*

**- PA Senator Bob Casey**

*“We truly do supply America, but not just with turbines, compressors, and control systems. The jobs manufacturing this equipment supply our families with healthcare, our kids with educations, our communities with resources, and our local economy. The tax base from our jobs help to fund local school districts and essential services.” - LaJennifer Lacombe, USW Local 1145*

---

## The Work Continues!

[Tell Congress Now is the Time to Act! \(usw.to/3w5\)](#)

*“We are at the cusp of turning this country around. We could build an economy by putting capital of labor against it. I am so proud of what we accomplished this week. We are ending this tour today but we are going to fight & win this thing!” – USW International President Tom Conway*

President Conway is right; we are not finished. We need to continue to tell the decision makers that now is the time to invest in ourselves, to modernize our infrastructure, and to create and sustain good paying, unionized jobs.

**Senate Toll-Free Number:**

*(Remember to make two calls to be connected to both.)*
